

## TERRIBLE CASE OF ECZEMA

Prominent Veterinary of Dover  
Suffered Tortures for  
Twelve Years

"FRUIT-A-TIVES" and "Sootha Salva"  
Finally Brought Relief

Dover, N. H.

"In 1906, I began to be troubled with Eczema. It started on my face and gradually spread. The second summer, I was so badly afflicted I had to lay off work. I would keep my hands tied up at night to prevent digging into my flesh while asleep. I spent hundreds of dollars in seeking relief. I would go for several months without trouble and then the Eczema would break out again and I would be in for a siege of suffering. My hands, especially across the knuckles, would be so puffed and swollen I could not do any obstetrical work or operations.

It was about three months ago I chanced to read an ad. of 'Fruit-a-tives' about a person being cured of Weeping Eczema by using this remedy and 'Sootha Salva'. I bought both and in about a week, noticed an improvement. I have now used two boxes of 'Fruit-a-tives' and one of 'Sootha Salva' and am entirely free of Eczema. My flesh is clear and smooth and I am that gratified with the result that I cannot proclaim too loudly the merits of these remedies."

E. N. OLZENBAM, D. V. M.  
Both remedies are sold at 50c. a box, 6 for \$2.50. At all dealers or sent postpaid by FRUIT-A-TIVES Limited, OGDENSBURG, N. Y.

Scent in Each Wood.  
Were our sense of smell more highly developed and better trained, says the American Forestry Magazine, we should find that every wood has its own peculiar scent by which alone it could be distinguished from all the rest.

Lines to Be Remembered.  
To be as good as our fathers, we must be better. Imitation is not discipleship. When someone sent a cracked plate to China to have a set made, every piece in the new set had a crack in it.—Wendell Phillips.

for all soils, locations and purposes and for all kinds of landscape (temporary and permanent).

Plants for the beginner and those up in the algebra of horticulture.

## TREES---Deciduous

BEECH—River's Purple Leaf, valued for its leaf color. Small ones, \$2.50, each.

BIRCH—Cut Leaf Weeping White, has the most ornamental qualities of any tree in cultivation. 25c. per foot in height.

LOCUST—Honey, when pruned annually makes the best defensive hedge. 2 and 3 feet, 10c each.

MT. ASH—European, has dark leaf foliage and orange scarlet berries in autumn, much larger than the Am. Mt. Ash, besides making a nice hound headed tree. \$1.75, each.

MULBERRY—Weeping. Branches drop to ground. \$2.50 to \$3, each.

OAK—Pin is fastest growing of the oaks, especially on moist soils. Leaves pinnatifid and bright green on both sides. \$1.75 each.

## EVERGREENS

They are O. K. all the year and indispensable in a winter landscape. Prices include ball of dirt in burlap, except spruce for hedges.

ARBORVITAE—Siberian is hardiest and most compact of its species and does not brown in winter. Usually a broad cone shape, but easily sheared into any shape. 18 in., \$2.00.

JUNIPER—Virginiana is a fine foliaged columnar grower. Succeeds best on light soils, wet or dry. 18 in., \$1.25; 2 ft., \$1.75; 3 ft., \$2.50.

HEMLOCK—Requires pruning to make compact as a specimen or for high hedge. 2 and 3 ft., \$1.50.

PINE—Austrian. Fast grower, long dark needles and most ornamental of all tall pines. 2 to 3 ft., \$1.50; 3 to 4 ft., \$3.00.

PINE—Nugho is a dwarf with rich green leaves and suitable for small yards as well as large estates. Most useful as well as one of the best of all evergreens. 1 ft. diameter, \$1.50; 18 in., \$2.25.

SPRUCE—Norway, is the most popular, fastest grower, and most graceful of all spruces, and can be sheared for hedges. 2 ft., \$1.25. My selection of 18 to 30 in. for hedges at 45c, but without ball of dirt.

YEW—Dwarf Japanese is hardiest of the Yews. Leaves glossy and almost black. Very slow grower. 18 in., \$3.50.

## VINES---all two years. No. 1

AMPELOPSIS—Engelman, resembles common woodbine, but will cling to brick or stone walls. 40c.

AMPELOPSIS—Iniquifolia or Virginia Creeper is common woodbine. 20c.

AMPELOPSIS—Veitchii or Boston Ivy is the kind mostly used on brick buildings. Slow grower when young, but fast when established. 45c.
